

SECURITIES AND EXCHANGE COMMISSION
Washington, D. C.

FORM U-3A-2

STATEMENT BY HOLDING COMPANY CLAIMING EXEMPTION
UNDER RULE U-2 FROM THE PROVISIONS OF THE PUBLIC
UTILITY HOLDING COMPANY ACT OF 1935

TO BE FILED ANNUALLY PRIOR TO MARCH 1

ALEXANDER & BALDWIN, INC.
(Name of Company)
P. O. Box 3440
Honolulu, Hawaii 96801

(hereinafter called the "Claimant") and its wholly-owned subsidiary, A&B-Hawaii, Inc., P. O. Box 3440, Honolulu, Hawaii 96801 (hereinafter called "Co-claimant"), hereby file with the Securities and Exchange Commission, pursuant to Rule U-2, this joint and consolidated statement claiming exemption as a holding company from the provisions of the Public Utility Holding Company Act of 1935. This statement is filed jointly by Claimant and Co-claimant pursuant to oral authorization to file on a joint and consolidated basis received from the Commission on February 21, 1990. In support of such claim for exemption the following information is submitted:

Co-Claimant: 4 steam-driven generators with rated capacities of 1 of 12,000 KW, 2 of 10,000 KW, and 1 of 20,000 KW; 5 hydroelectric plants with rated capacities of 1 of 1,000 KW, 3 of 1,500 KW and 1 of 500 KW; about 80 miles of transmission lines; all located on the island of Maui, State of Hawaii

McBryde Sugar Company, Limited ("McBryde") (Note 1) 2 steam-driven generators with rated capacities of 7,500 KW; 2 hydroelectric plants with rated capacities of 1 of 1,000 KW and 1 of 3,600 KW; about 70 miles of transmission lines; all located on the island of Kauai, State of Hawaii

3. Information for the calendar year 1996 with respect to Claimant and Co-claimant, and each of their subsidiary public utility companies:

(a)(1) Number of kwh of electric energy sold (all sales were at wholesale):

Claimant	None
Co-claimant	82,441,521 kwh
McBryde	25,227,000 kwh

Note 1. McBryde Sugar Company, Limited has filed with the Securities and Exchange Commission an application for an order declaring that it is not an electric utility company.

(2) Number of Mcf of natural or manufactured gas distributed at retail:

None. Neither Claimant nor Co-claimant, nor any of their subsidiary public utility companies, distributes any natural or manufactured gas at retail.

(b) Number of kwh of electric energy and Mcf of natural or manufactured gas distributed at retail outside the State in which each such company is organized:

None. Neither Claimant nor Co-claimant, nor any of their subsidiary public utility companies, distributes any electric energy or natural or manufactured gas at retail outside the State in which each such company is organized.

(c) Number of kwh of electric energy and Mcf of natural or manufactured gas sold at wholesale outside the State in which each such company is organized, or at the State line:

None. Neither Claimant nor Co-claimant, nor any of their subsidiary public utility companies, sells electric energy or natural or manufactured gas at wholesale (or otherwise) outside the State in which each such company is organized, or at the State line.

(d) Number of kwh of electric energy and Mcf of natural or manufactured gas purchased outside the State in which each such company is organized, or at the State line:

None. Neither Claimant nor Co-claimant, nor any of their subsidiary public utility companies, purchases any electric energy or natural or manufactured gas outside the State in which each such company is organized, or at the State line.

4. The following information for the reporting period with respect to Claimant and Co-claimant and each interest they hold directly or indirectly in an EWG or a foreign utility company, stating monetary amounts in United States dollars:

(a) Name, location, business address and description of the facilities used by the EWG or foreign utility company for the generation, transmission and distribution of electric energy for sale or for the distribution at retail of natural or manufactured gas.

Not applicable. Neither Claimant nor Co-claimant holds any interest, directly or indirectly, in an EWG or a foreign utility company.

(b) Name of each system company that holds an interest in such EWG or foreign utility company; and description of the interest held.

No applicable (see 4(a) above).

(c) Type and amount of capital invested, directly or

indirectly, by the holding company claiming exemption; any direct or indirect guarantee of the security of the EWG or foreign utility company by the holding company claiming exemption; and any debt or other financial obligation for which there is recourse, directly or indirectly, to the holding company claiming exemption or another system company, other than the EWG or foreign utility company.

Not applicable (see 4(a) above).

(d) Capitalization and earnings of the EWG or foreign utility company during the reporting period.

Not applicable (see 4(a) above).

(e) Identify any service, sales or construction contract(s) between the EWG or foreign utility company and a system company, and describe the services to be rendered or goods sold and fees or revenues under such agreement(s).

Not applicable (see 4(a) above).

EXHIBIT A

NOTES TO FINANCIAL STATEMENTS

ALEXANDER & BALDWIN, INC. AND SUBSIDIARIES

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

BASIS OF CONSOLIDATION: The consolidated financial statements include the accounts of Alexander & Baldwin, Inc. and all subsidiaries, after elimination of significant intercompany amounts.

OCEAN TRANSPORTATION: Voyage revenue and variable costs and expenses are included in income at the time each voyage leg commences. This method of accounting does not differ materially from other acceptable accounting methods.

Vessel depreciation, charter hire, terminal operating overhead, and general and administrative expenses are charged to expense as incurred. Expected costs of regularly-scheduled dry docking of vessels and planned major vessel repairs performed during dry docking are accrued.

PROPERTY DEVELOPMENT AND MANAGEMENT: Sales are recorded when the risks and benefits of ownership have passed to the buyers (generally at closing dates), adequate down payments have been received and collection of remaining balances is reasonably assured.

Expenditures for real estate developments are capitalized during construction and are classified as Real Estate Developments on the balance sheet. When construction is complete, the costs are reclassified either as Property or as Real Estate Held For Sale, based upon the Company's intent to sell the completed asset or to hold it as an investment. Cash flows related to real estate developments are classified as operating or investing activities, based upon the Company's intention either to sell the property or to retain ownership of the property as an investment following completion of construction.

FOOD PRODUCTS: Revenue is recorded when refined sugar products and coffee are sold to third parties.

Costs of growing sugar cane are charged to the cost of production in the year incurred and to cost of sales as refined products are sold. The cost of raw cane sugar purchased from third parties is recorded as inventory at the purchase price.

Costs of developing coffee are capitalized during the development period and depreciated over the estimated productive lives of the orchards. Costs of growing coffee are charged to inventory in the year incurred and to cost of sales as coffee is sold.

CASH AND CASH EQUIVALENTS: The Company considers highly liquid investments purchased with original maturities of three months or less, which have no significant risk of change in value, to be cash equivalents.

INVENTORIES: Sugar inventory, consisting of raw and refined sugar products, and coffee inventory, are stated at the lower of cost (first-in, first-out basis) or market. Other inventories, composed principally of materials and supplies, are stated at the lower of cost (principally average cost) or market.

PROPERTY: Property is stated at cost. Major renewals and betterments are capitalized. Replacements, maintenance and repairs which do not improve or extend asset lives are charged to expense as incurred. Assets held under capital leases are included with property owned. Gains or losses from property disposals are included in income.

CAPITALIZED INTEREST: Interest costs incurred in connection with significant expenditures for real estate developments or the construction of assets are capitalized.

DEPRECIATION: Depreciation is computed using the straight-line method. Depreciation expense includes amortization of assets under capital leases and vessel spare parts.

Estimated useful lives of property are as follows:

Buildings.....	10 to 50 years
Vessels.....	10 to 40 years
Marine containers.....	15 years
Machinery and equipment.....	3 to 35 years
Utility systems and other depreciable property.....	5 to 60 years

OTHER NON-CURRENT ASSETS: Other non-current assets consist principally of

sugar supply contracts and intangible assets. These assets are being amortized using the straight-line method over periods not exceeding 30 years.

PENSION PLANS: Certain ocean transportation subsidiaries are members of the Pacific Maritime Association (PMA), the Maritime Service Committee or the Hawaii Stevedore Committee, which negotiate multi-employer pension plans covering certain seagoing and shoreside bargaining unit personnel. The subsidiaries negotiate multi-employer pension plans covering other bargaining-unit personnel. Pension costs are accrued in accordance with contribution rates established by the PMA, the parties to a plan or the trustees of a plan. Several trustee, noncontributory, single-employer defined benefit plans cover substantially all other employees.

INCOME TAXES: Income tax expense is based on revenue and expenses in the statements of income. Deferred income tax liabilities and assets are computed at current tax rates for temporary differences between the financial statement and income tax bases of assets and liabilities.

FAIR VALUES: The carrying values of current assets (other than inventories, real estate held for sale, deferred income taxes and prepaid and other assets) and of debt instruments are reasonable estimates of their fair values. Real estate is carried at the lower of cost or fair value. Fair values are generally determined using the expected market value for the property, less sales costs. For residential units and lots held for sale, fair value is determined by reference to the sales of similar property, market studies, tax assessments and discounted cash flows. For commercial property, fair value is determined using recent comparable sales, tax assessments and cash flow analysis. A large portion of the Company's real estate is undeveloped land located in Hawaii. This land has a cost basis which averages approximately \$150 per acre, a value which is much lower than fair value.

FUTURES CONTRACTS: Realized and unrealized gains and losses on commodity futures contracts are deferred and recorded in inventory. These amounts are not significant.

ENVIRONMENTAL COSTS: Environmental expenditures that relate to current operations are expensed or capitalized as appropriate. Expenditures that relate to an existing condition caused by past operations or events, and which do not contribute to current or future revenue generation, are charged to expense. Liabilities are recorded when environmental assessments or remedial efforts are probable and the costs can be reasonably estimated.

USE OF ESTIMATES: The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenue and expenses during the reporting periods. Future actual amounts could differ from those estimates.

RECLASSIFICATIONS: Certain amounts in the 1995 and 1994 financial statements have been reclassified to conform with the 1996 presentation.

RESTATEMENTS: The financial statements for all periods presented have been restated to reflect the sale of certain net assets of the Company's container leasing segment, as described in Note 2.

2. DISCONTINUED OPERATIONS

In June 1995, the Company sold the net assets of its container leasing subsidiary, Matson Leasing Company, Inc., for \$361.7 million in cash, and realized an after-tax gain of \$18 million. Specifically excluded from the sale were long-term debt and U. S. tax obligations of the business.

Summary operating results of discontinued operations, excluding the above gain, were as follows:

	1995	1994
	----	----
	(In thousands)	
Net sales	\$35,251	\$ 63,060
	=====	=====
Gross profit	\$14,762	\$ 24,499
	=====	=====
Earnings before income taxes	\$ 8,564	\$ 16,604
Income taxes	3,228	5,975
	-----	-----
Net earnings from discontinued operations.....	\$ 5,336	\$ 10,629
	=====	=====

3. INVESTMENTS

At December 31, 1996 and 1995, investments principally consisted of marketable equity securities, limited partnership interests and purchase-money mortgages.

The marketable equity securities are classified as "available for sale" and are stated at quoted market values. The unrealized holding gains on these securities, net of deferred income taxes, have been recorded as a separate component of shareholders' equity.

The components of the net unrealized holding gains at December 31, 1996 and 1995 were as follows:

	1996 ----	1995 ----
	(In thousands)	
Market value.....	\$85,796	\$73,460

Less deferred income taxes	27,625	23,664
	-----	-----
Net unrealized holding gains	<u>\$48,205</u>	<u>\$39,830</u>
	=====	=====

The investments in limited partnership interests and purchase money mortgages are recorded at cost, which approximated market values, of \$5,806,000 and \$8,786,000 at December 31, 1996 and 1995, respectively. The purchase money mortgages are intended to be held to maturity. The value of the underlying investments of the limited partnership interests are assessed annually and are approximately equal to the original cost.

See Note 4 for a discussion of market values of investments in the Capital Construction Fund.

4. CAPITAL CONSTRUCTION FUND

A subsidiary is party to an agreement with the United States Government which established a Capital Construction Fund (CCF) under provisions of the Merchant Marine Act, 1936, as amended. The agreement has program objectives for the acquisition, construction or reconstruction of vessels and for repayment of existing vessel indebtedness. Deposits to the CCF are limited by certain applicable earnings. Such deposits are Federal income tax deductions in the year made; however, they are taxable, with interest payable from the year of deposit, if withdrawn for general corporate purposes or other non-qualified purposes, or upon termination of the agreement. Qualified withdrawals for investment in vessels having adequate tax bases do not give rise to a current tax liability, but reduce the depreciable bases of the vessels or other assets for income tax purposes. Amounts deposited into the CCF are a preference item for calculating Federal alternative minimum taxable income. Deposits not committed for qualified purposes within 25 years from the date of deposit, will be treated as non-qualified withdrawals over the subsequent five years. As of year-end, the oldest CCF deposits date from 1991. Management believes that all amounts on deposit in the CCF at the end of 1996 will be used or committed for qualified purposes prior to the expiration of the applicable 25-year periods.

Under the terms of the CCF agreement, the subsidiary may designate certain qualified earnings as "accrued deposits" or may designate, as obligations of the CCF, qualified withdrawals to reimburse qualified expenditures initially made with operating funds. Such accrued deposits to and withdrawals from the CCF are reflected on the balance sheet either as obligations of the Company's current assets or as receivables from the CCF.

The Company has classified its investments in the CCF as "held-to-maturity" and, accordingly, has not reflected temporary unrealized market gains and losses on the balance sheets or statements of income. The long-term nature of the CCF program supports the Company's intention to hold these investments to maturity.

At December 31, 1996 and 1995, the balances on deposit in the CCF are summarized in Table 1.

Fair value of the mortgage-backed securities ("MBS") was determined by an outside investment management company, based on the experience of trading identical or substantially similar securities. No central exchange exists for these securities; they are traded over-the-counter.

At the end of 1996, the fair value of the Company's investments in MBS is less than amortized cost due to interest rate sensitivity inherent in the fair value determination of such securities. While an unrealized market loss exists, the Company intends to hold these investments to maturity, which ranges from 1997 through 2024. The MBS have a weighted average life of approximately six years. The Company earned \$6,838,000 in 1996, \$7,655,000 in 1995 and \$8,292,000 in 1994 on its investments in MBS.

Fair values of the remaining CCF investments were based on quoted market prices, if available. If a quoted market price was not available, fair value was estimated using quoted market prices of similar securities and investments. These remaining investments mature in 1997.

During 1996 and 1995, there were no sales of securities classified as "held-to-maturity" included in the CCF.

5. EMPLOYEE BENEFIT PLANS

Total contributions to the multi-employer pension plans covering personnel in shoreside and seagoing bargaining units were \$5,552,000 in 1996, \$5,903,000 in 1995 and \$8,216,000 in 1994. Union collective bargaining agreements provide that total employer contributions during the terms of the agreements must be sufficient to meet the normal costs and amortization payments required to be funded during those periods. Contributions are generally based on union labor used or cargo handled or carried. A portion of such contributions is for unfunded accrued actuarial liabilities of the plans being funded over periods of 25 to 40 years, which began between 1967 and 1976.

The multi-employer plans are subject to the plan termination insurance provisions of the Employee Retirement Income Security Act of 1974, as amended, and are paying premiums to the Pension Benefit Guarantee Corporation (PBGC). The statutes provide that an employer which withdraws from or significantly reduces its contribution obligation to a multi-employer plan generally will be required to continue funding its proportional share of the plan's unfunded vested benefits.

Under special rules approved by the PBGC and adopted by the longshore plan in 1984, the Company could cease Pacific Coast cargo-handling operations permanently and stop contributing to the plan without any withdrawal liability, provided that the plan meets certain funding obligations as defined in the plan. The estimated withdrawal liabilities under the Hawaii longshore plan and the seagoing plans aggregated approximately \$6,400,000 for various plan years ending in 1996 and 1995. Management has no present intention of withdrawing from and does not anticipate termination of any of the aforementioned plans.

The net pension cost (benefit) and components for 1996, 1995 and 1994, of single-employer defined benefit pension plans, which cover substantially all other employees, were as follows:

	1996	1995	1994

The funded status of the single-employer plans at December 31, 1996 and 1995 was as follows:

	1996	1995
	----	----
	(In thousands)	
Actuarial present value of benefit obligation:		
Vested benefits	\$ 284,755	\$ 241,422

	-----	-----
Accrued pension liability.....	\$ 3,651	\$ 13,345
	=====	=====

At December 31, 1996 and 1995, the projected benefit obligation was determined using a discount rate of 7.5% and 8%, respectively, and assumed increases in future compensation levels of 4.5% and 5%, respectively. The expected long-term rate of return on assets was 9% for 1996 and 1995. The assets of the plans consist principally of listed stocks and bonds.

Contributions are determined annually for each plan by the Company's pension administrative committee, based upon the actuarially determined minimum required contribution under ERISA and the maximum deductible contribution allowed for tax purposes. For the plans covering employees who are members of collective bargaining units, the benefit formulas are determined according to the collective bargaining agreements, either using career average pay as the base or a flat dollar amount per year of service. The benefit formulas for the remaining defined benefit plans are based on final average pay.

The Company has non-qualified supplemental pension plans covering certain employees and retirees, which provide for incremental pension payments from the Company's general funds so that total pension benefits would be substantially equal to amounts that would have been payable from the Company's qualified pension plans if it were not for limitations imposed by income tax regulations. The projected benefit obligation, included with other non-current liabilities, relating to these unfunded plans, totaled \$9,844,000 and \$8,680,000 at December 31, 1996 and 1995, respectively.

6. POST-RETIREMENT BENEFIT PLANS

The Company has plans that provide certain retiree health care and life insurance benefits to substantially all salaried and to certain hourly employees. Employees are generally eligible for such benefits upon retirement and completion of a specified number of years of credited service. The Company does not pre-fund these benefits and has the right to modify or terminate certain of these plans in the future. Certain groups of retirees pay a portion of the benefit costs.

The net periodic cost for post-retirement health care and life insurance benefits during 1996, 1995 and 1994 included the following:

	1996	1995	1994
	----	----	----
	(In thousands)		
Service cost.....	\$ 1,351	\$ 1,512	\$ 2,149

The unfunded accumulated post-retirement benefit obligation at December 31,

1996 and 1995 is summarized below:

	1996 ----	1995 ----
	(In thousands)	
Accumulated post-retirement benefit obligation:		
Retirees	\$ 54,951	\$ 56,606

Current obligation.....	5,710	5,118
	-----	-----
Non-current obligation.....	\$116,047	\$118,472
	=====	=====

At December 31, 1996 and 1995, the weighted average discount rates used in determining the accumulated post-retirement benefit obligations were 7.5% and 8%, respectively, and the assumed health care cost trend rate used in measuring the accumulated post-retirement benefit obligation was 10% through 2001, decreasing to 5% thereafter. If the assumed health care cost trend rate were increased by one percentage point, the accumulated post-retirement benefit obligation as of December 31, 1996 and 1995 would have increased by approximately \$11,105,000 and \$10,405,000, respectively, and the net periodic post-retirement benefit cost for 1996 and 1995 would have increased by approximately \$1,208,000 and \$1,190,000, respectively.

7. LONG-TERM DEBT, CREDIT AGREEMENTS

At December 31, 1996 and 1995, long-term debt consisted of the following:

VARIABLE RATE LOANS: The Company and a subsidiary have a revolving credit and term loan agreement with five commercial banks, whereby they may borrow up to \$155,000,000, under revolving loans to November 30, 1998, at varying rates of interest. Any revolving loan outstanding on that date may be converted into a term loan, which would be payable in 16 equal quarterly installments. The agreement contains certain restrictive covenants, the most significant of which requires the maintenance of an interest coverage ratio of 2:1. At December 31, 1996 and 1995, \$15,000,000 and \$10,000,000, respectively, were outstanding under this agreement.

The Company and a subsidiary have an uncommitted \$45,000,000 short-term revolving credit agreement with a commercial bank. The agreement extends to November 30, 1997, but may be canceled by the bank at any time. At December 31, 1996 and 1995, \$7,000,000 and \$17,000,000, respectively, were outstanding under this agreement.

The Company and a subsidiary have an uncommitted \$25,000,000 revolving credit agreement with a commercial bank. The agreement extends to July 18, 1997. At December 31, 1996, there were no amounts outstanding under this agreement. At December 31, 1995, \$13,000,000 was outstanding.

During 1995, a subsidiary entered into a \$50,000,000 one-year Revolving Credit

Agreement to replace two previous credit facilities. Up to \$25,000,000 of this agreement serves as a commercial paper liquidity back-up line, with the balance available for general corporate funds. At December 31, 1996 and 1995, there were no amounts outstanding under this agreement.

TERM LOAN: The Company and a subsidiary have a shelf facility under which they may borrow up to \$50,000,000 in \$5,000,000 term loan increments. At December 31, 1996, \$15,000,000 had been borrowed.

COMMERCIAL PAPER: At December 31, 1996, there were two commercial paper programs. The first program was used by a subsidiary to finance the construction of a vessel, which was delivered in 1992. At December 31, 1996, \$149,632,000 of commercial paper notes was outstanding under this program. Maturities ranged from 6 to 66 days. The borrowings outstanding under this program are classified as long-term, because the subsidiary intends to continue the program indefinitely and eventually to repay the borrowings with qualified withdrawals from the Capital Construction Fund.

The second commercial paper program is used by a subsidiary to fund the purchases of sugar inventory from Hawaii sugar growers and to provide working capital for sugar refining and marketing operations. At December 31, 1996, \$76,000,000 of commercial paper notes was outstanding under this program. Maturities ranged from 7 to 51 days. The interest cost and certain fees on the borrowings relating to sugar inventory advances to growers are reimbursed by the growers. Of the total commercial paper borrowing outstanding at December 31, 1996, \$62,000,000 was classified as current. The commercial paper is supported by a \$100,000,000 backup revolving credit facility with six commercial banks. Both the commercial paper program and the backup facility are guaranteed by the subsidiary's parent and by the Company.

In 1995, the Company repaid the outstanding commercial paper notes of a third program which had been used to finance container purchases of the discontinued container leasing business.

LONG-TERM DEBT MATURITIES: At December 31, 1996, maturities and planned prepayments of all long-term debt during the next five years totaled \$31,966,000 for 1997, \$24,453,000 for 1998, \$32,616,000 for 1999, \$19,583,000 for 2000 and \$17,083,000 for 2001.

8. LEASES

THE COMPANY AS LESSEE: Various subsidiaries of the Company lease a vessel and certain land, buildings and equipment under both capital and operating leases. Capital leases include one vessel leased for a term of 25 years ending in 1998; containers, machinery and equipment for terms of 5 to 12 years expiring through 1997; and a wastewater treatment facility in California, the title to which will revert to a subsidiary in 2002. Principal operating leases cover office and terminal facilities for periods which expire between 1997 and 2026. Management expects that in the normal course of business, most operating leases will be renewed or replaced by other similar leases.

Rental expense under operating leases totaled \$50,869,000, \$46,680,000 and \$48,169,000 for the years ended December 31, 1996, 1995 and 1994, respectively. Contingent rents and income from sublease rents were not significant.

A subsidiary is obligated to pay terminal facility rent equal to the principal and interest on Special Facility Revenue Bonds issued by the Department of Transportation of the State of Hawaii. Interest on the bonds is payable semi-annually and principal, in the amount of \$16,500,000, is due in 2013. An accrued liability of \$7,713,000 and \$7,170,000 at December 31, 1996 and 1995, respectively, included in other long-term liabilities, provides for a pro-rata portion of the principal due on these bonds.

THE COMPANY AS LESSOR: Various Company subsidiaries lease land, buildings and land improvements under operating leases. The historical cost of and accumulated depreciation on leased property at December 31, 1996 and 1995 were as follows:

The Internal Revenue Service (IRS) has completed its audits of the Company's tax returns through 1991 and, with one exception, has settled all substantive issues raised during the audits. No settlement had a material effect on the Company's financial position or results of operations. The Company is contesting the remaining issue, which relates to the classification of cross border lease transactions. The IRS has commenced an audit of the Company's tax returns for 1992 through 1995. Management believes that the ultimate resolution of the outstanding audit issue and other matters which may result from the current audits will not have a material effect on the Company's financial position or results of operations.

10. CAPITAL STOCK AND STOCK OPTIONS

The Company has a stock option plan ("1989 Plan") under which key employees may be granted stock purchase options and stock appreciation rights. A second stock option plan for key employees terminated in 1993, but shares previously granted under the plan are still exercisable. Under the 1989 Plan, option prices may not be less than the fair market value of a share of the Company's common stock on the dates of grant, and each option generally becomes exercisable in-full one year after the date granted. Payment for options exercised, to the extent not reduced by the application or surrender of stock appreciation rights, may be made in cash or in shares of the Company's stock. If payment is made in shares of the Company's stock, the option holder may receive, under a reload feature of the 1989 Plan, a new stock option grant for the number of shares equal to that surrendered, with an option price not less than the fair market value of the Company's stock on the date of exercise. During 1996, 471,264 new options were granted under the 1989 Plan, including 40,489 reload options.

The 1989 Plan also permits issuance of shares of the Company's common stock as a reward for past service rendered to the Company or one of its subsidiaries or as an incentive for future service with such entities. The recipients' interest in such shares may be fully vested upon issuance or may vest in one or more installments, upon such terms and conditions as are determined by the committee which administers the plan. The number of incentive shares issued during 1996 or outstanding at the end of the year was not material.

The Company also has a Directors' stock option plan, under which each non-employee Director of the Company, elected at an Annual Meeting of Shareholders, is automatically granted, on the date of each such Annual Meeting, an option to purchase 3,000 shares of the Company's common stock at the average fair market value of the shares for the five consecutive trading days prior to the grant date. Each option becomes exercisable six months after the date granted. During 1996, 24,000 new options were granted and no options were canceled or exercised. At December 31, 1996, 186,000 options were outstanding under the plan.

The Company applies Accounting Principles Board Opinion Number 25, "Accounting for Stock Issued to Employees," and related Interpretations in accounting for its stock-based compensation plans. Accordingly, no compensation cost is recognized in the Company's income statement for stock option plans at the time grants are awarded. If the compensation costs for the 1989 Plan had been determined consistent with Statement of Financial Accounting Standards No. 123, "Accounting for Stock-Based Compensation," the after-tax cost for grants made in 1996 and 1995 would have been approximately \$900,000 and \$1.3 million, respectively. Earnings per share for 1996 and 1995 would have declined by \$0.02 and \$0.03, respectively. The potential impact of the Director's stock option plan was immaterial.

Changes in shares under all option plans, for the three years ended December 31, 1996, were as follows:

	Shares -----	Price Range Per Share -----
1994: Granted.....	475,200	\$24.700-27.000
Exercised.....	(12,300)	17.375-24.750
Canceled.....	(55,996)	24.250-36.250

Outstanding, December 31.....	2,444,032	17.375-37.875
1995: Granted.....	551,800	21.750-22.500
Exercised.....	(23,550)	17.375-24.750
Canceled.....	(385,531)	24.250-36.250

Outstanding, December 31.....	2,586,751	17.375-37.875
1996: Granted.....	495,264	21.750-32.625
Exercised.....	(125,188)	17.375-24.750
Canceled.....	(15,800)	24.250-36.250

Outstanding, December 31 (2,510,252 exercisable)	2,941,027	\$17.375-37.875
	=====	

Options outstanding at December 31, 1996 include 48,916 shares that carry stock appreciation rights which expire in January 1997. The outstanding options do not have a material dilutive effect in the calculation of earnings per share of common stock.

The Company has a Shareholder Rights Plan, designed to protect the interests of shareholders in the event an attempt is made to acquire the Company. The rights initially will trade with the Company's outstanding common stock and will not be exercisable absent certain acquisitions or attempted acquisitions of specified percentages of such stock. If exercisable, the rights generally entitle shareholders to purchase additional shares of the Company's stock or shares of an acquiring company's stock at prices below market value.

11. RELATED PARTY TRANSACTIONS, COMMITMENTS AND CONTINGENCIES

At December 31, 1996, the Company and its subsidiaries had an unspent balance of total appropriations for capital expenditures of approximately \$46,688,000. However, there is no contractual obligation to spend this entire amount.

The Company has arranged for standby letters of credit of approximately \$20,689,000, necessary to qualify as a self-insurer for state and federal workers' compensation liabilities. The Company also has other letters of credit outstanding for normal operating matters which total approximately \$4,701,000.

A subsidiary is a party, acting as the steam host, to a Steam Purchase Agreement with a developer which constructed and operates a cogeneration facility contiguous to the subsidiary's California refinery. The agreement

provides that, during the 30-year period of the agreement, the subsidiary will receive steam necessary for refinery operations at a reduced price, compared to the market price of fuel which previously had to be purchased to generate its steam requirements.

A subsidiary is party to a long-term sugar supply contract with Hawaiian Sugar & Transportation Cooperative (HSTC), a raw sugar marketing and transportation cooperative owned by the Company and by the other Hawaii sugar growers. Under the terms of this contract, the subsidiary is obligated to purchase, and HSTC is obligated to sell, all of the raw sugar delivered to HSTC by the Hawaii sugar growers, at prices determined by the quoted domestic sugar market. The subsidiary made purchases of raw sugar totaling \$190,196,000 and \$158,284,000 under the contract during 1996 and 1995, respectively. The contract also requires that the subsidiary provide cash advances to HSTC prior to the physical receipt of the sugar at its refinery (see Note 7). Such advances are determined by the estimated raw sugar market prices. Amounts due to HSTC are credited against outstanding advances to HSTC upon delivery of raw sugar to the subsidiary's refinery.

The Company and certain subsidiaries are parties to various legal actions and are contingently liable in connection with claims and contracts arising in the normal course of business, the outcome of which, in the opinion of management after consultation with legal counsel, will not have a material adverse effect on the Company's financial position or results of operations.

12. INDUSTRY SEGMENTS

Industry segment information for 1996, 1995 and 1994, on page 26, is incorporated herein by reference. Segments are:

Ocean transportation -- carrying freight between various U.S. and Canadian West Coast, Hawaii and other Pacific ports, and providing terminal services.

Property development and management -- developing, managing and selling residential, commercial and industrial properties.

Food products -- growing, processing and marketing sugar, molasses and coffee, and generating and selling electricity.

As discussed in Note 2, the net assets of the container leasing segment were sold in 1995.

13. SUBSEQUENT EVENT

On February 13, 1997, a subsidiary received \$33,650,000 in settlement of a lawsuit that involved insurance claims over damage to the subsidiary's port facilities resulting from the October 1989 Loma Prieta earthquake. After satisfying terminal repair costs and litigation expenses of approximately \$12,600,000, the Company, through its subsidiaries, will record approximately \$21,000,000 of pre-tax income in the first quarter of 1996. After taxes, this will add about \$13,000,000, or \$0.29 per share, to net income during that period.
